How to install Excel XPS macro on the Mac Excel 2016

hideki

Ver. 8.39

1st. 9 Jun. 2017 for Ver. 8.28

Rev. 6 Nov. 2018

Installation of macro on Mac

- The process is the same as that in Windows version except database folder.
  - Personal macro workbook
  - Solver add-in and reference in VBE
  - Shortcut key for cmd + opt + “e”
  - Database folder

The latest version of Excel works great, keep updating your Excel.

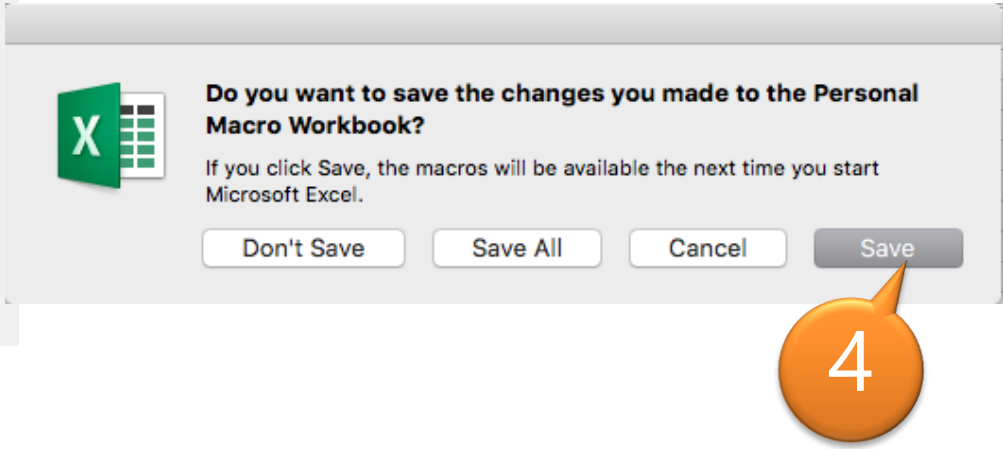
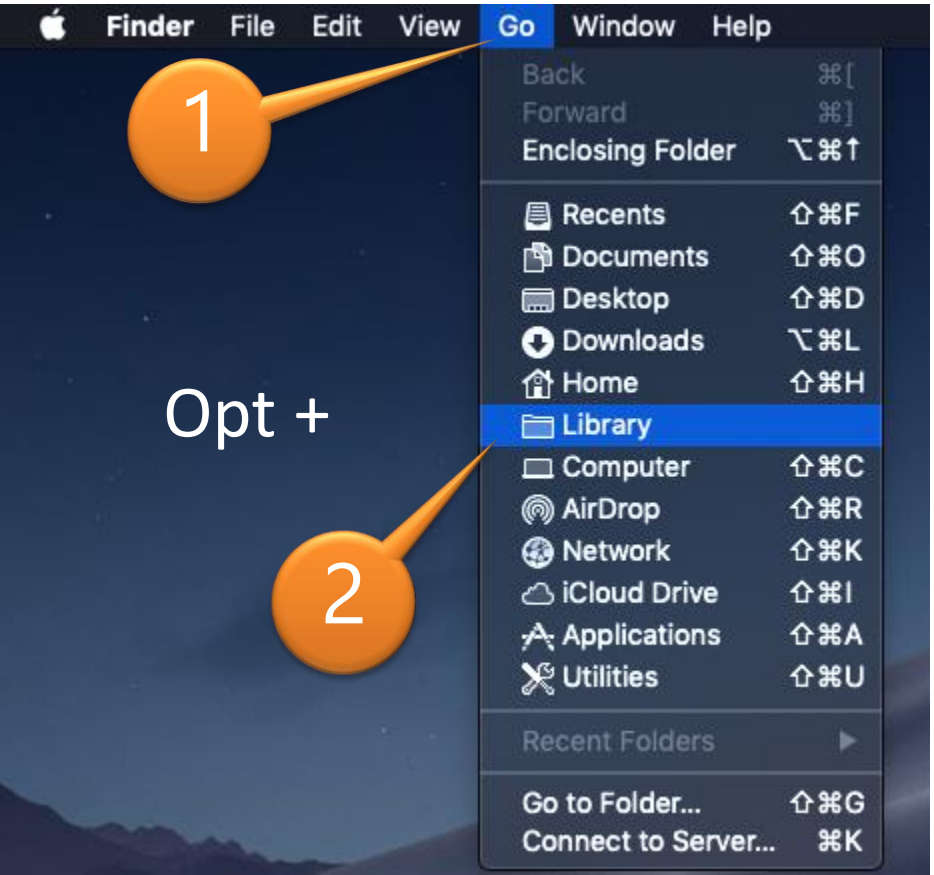
Quit Excel



Do you want to save the changes you made to the Personal Macro Workbook?
If you click Save, the macros will be available the next time you start Microsoft Excel.
Don't Save
Save All
Cancel
Save
4

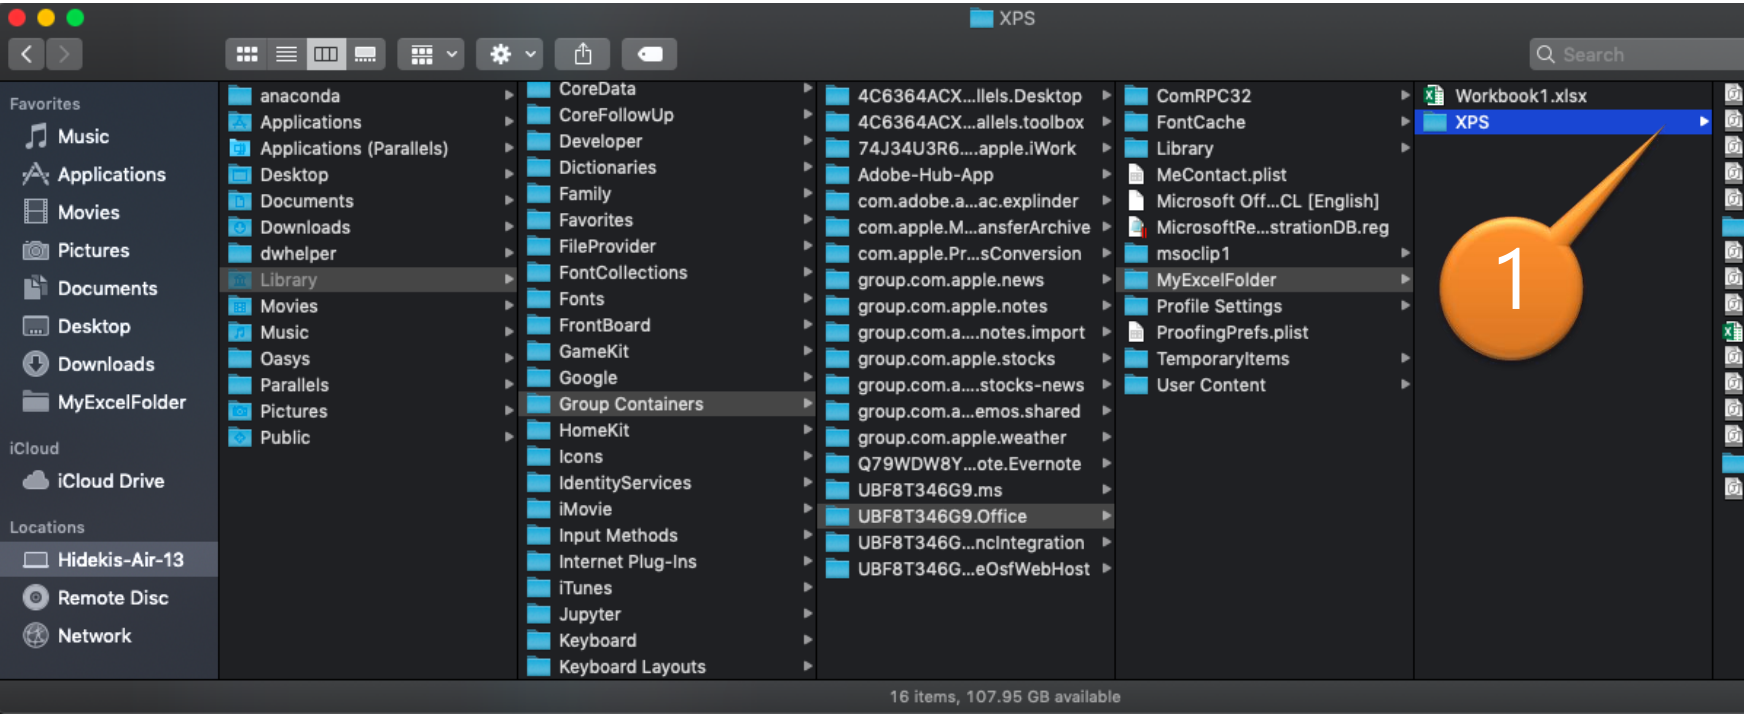
1. Open a Finder Window
2. Hold the **Alt (Option)** key when you press on **Go** in the Finder menu bar
3. Click on **Library**
4. Open the **Group Containers** folder
5. Open the **UBF8T346G9.Office** folder
6. Create a Folder inside this folder named ***MyExcelFolder*** for example
7. Select this folder



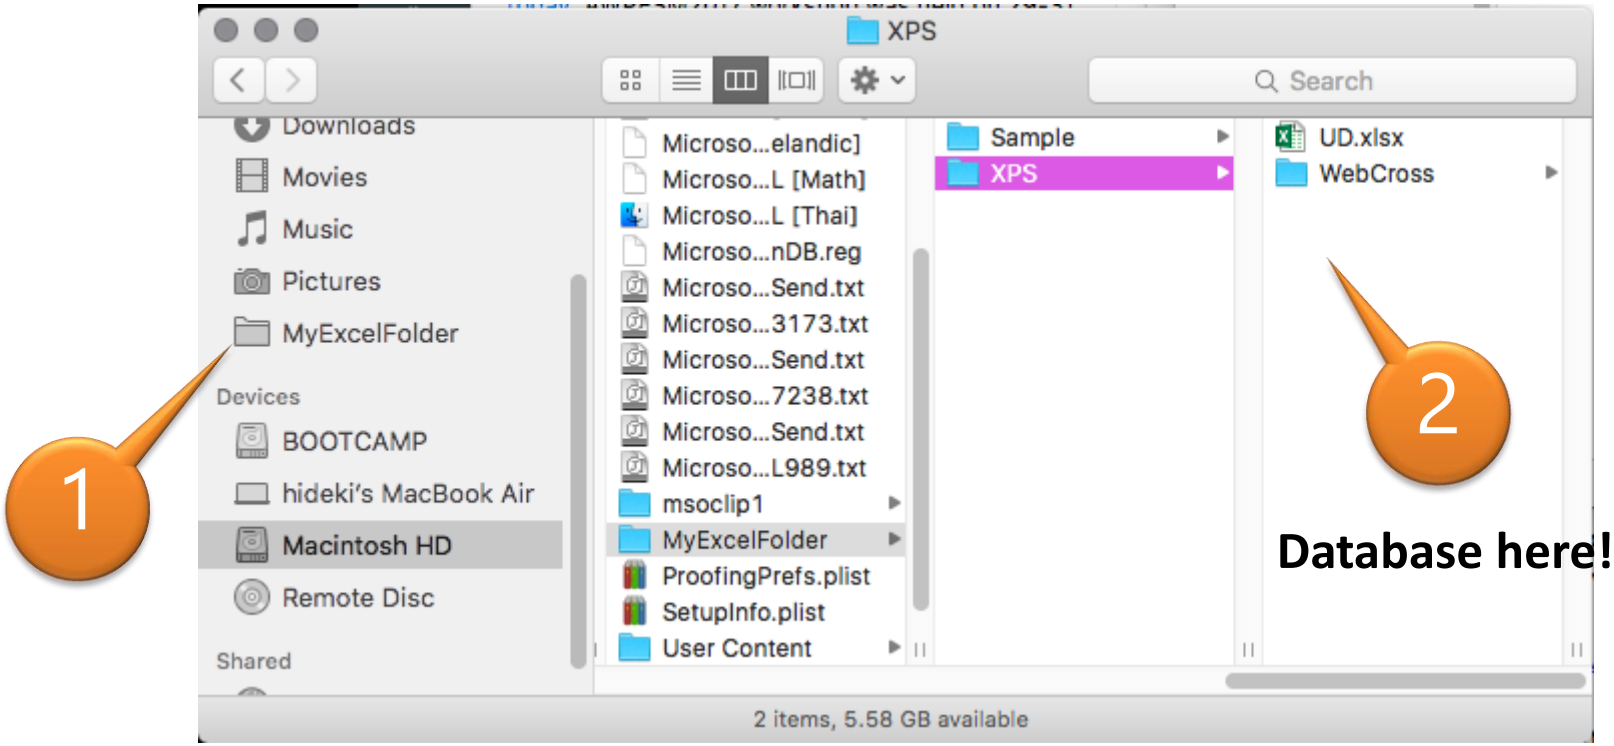
Library folder can be accessed from Go with Option key, otherwise no Library menu appears as shown in Fig.

https://www.rondebruin.nl/mac/mac034.htm

Database (or workbook) files should be placed in Library/Group Containers/UBF8T346G9.Ofice/*MyExcelFolder*/XPS/

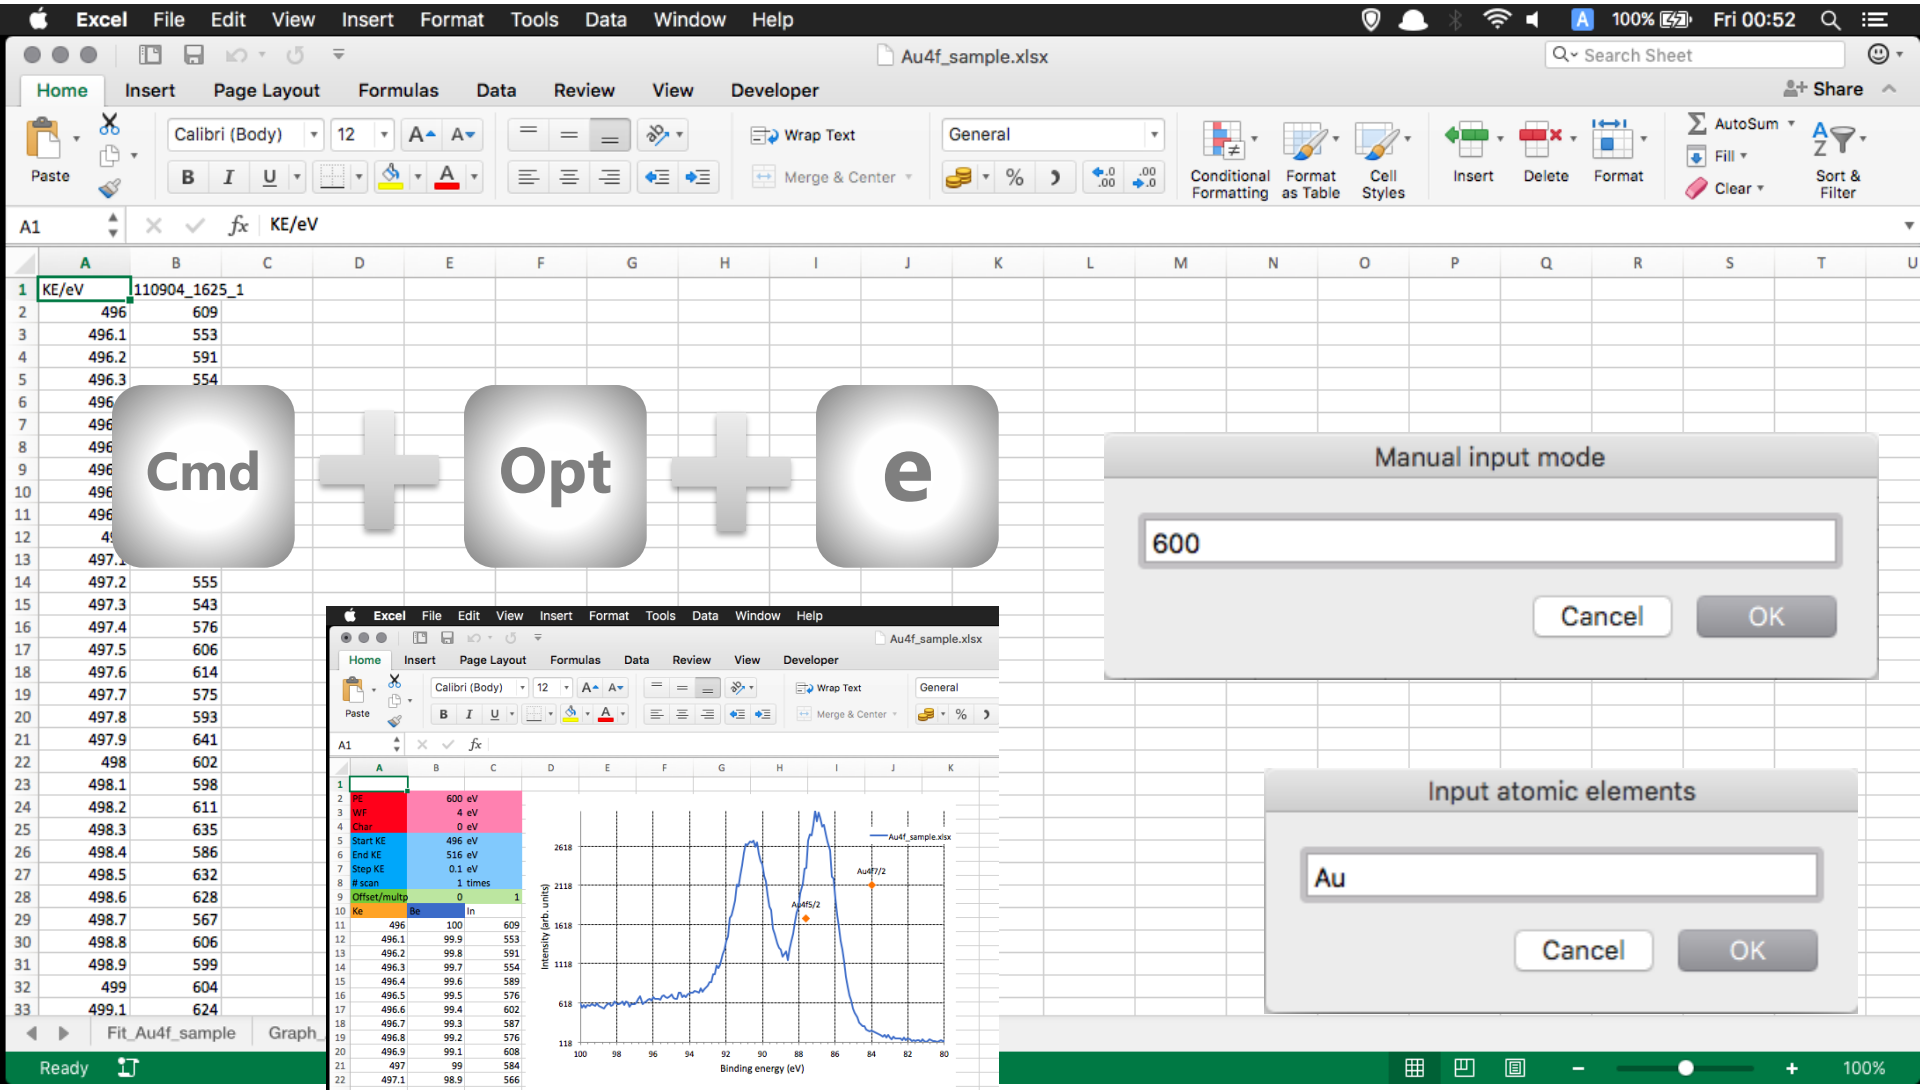


Drag & drop ***MyExcelFolder*** into Favorites menu for next access.

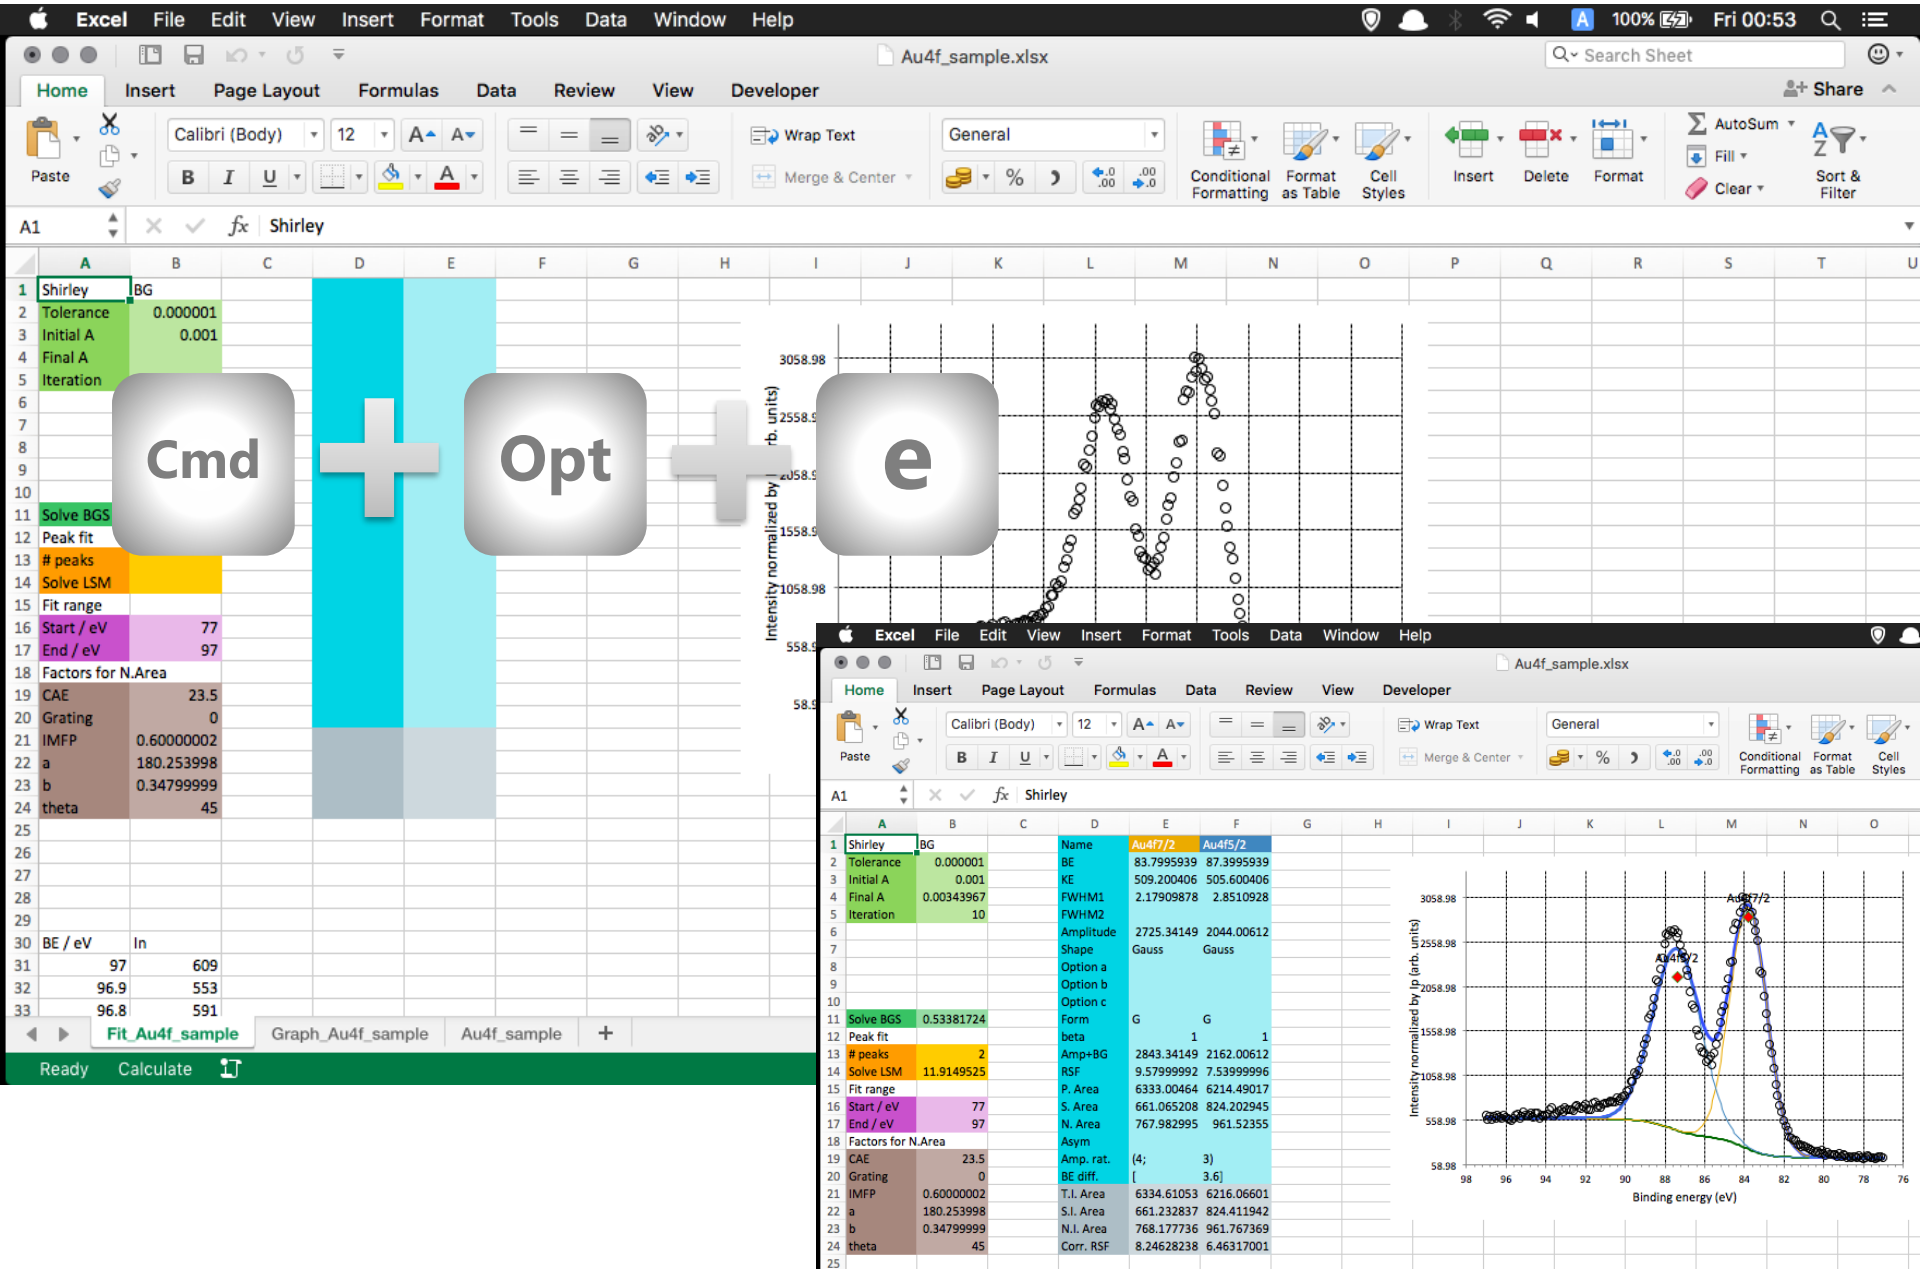


Well done!

Open the sample file with Excel and use shortcut key.



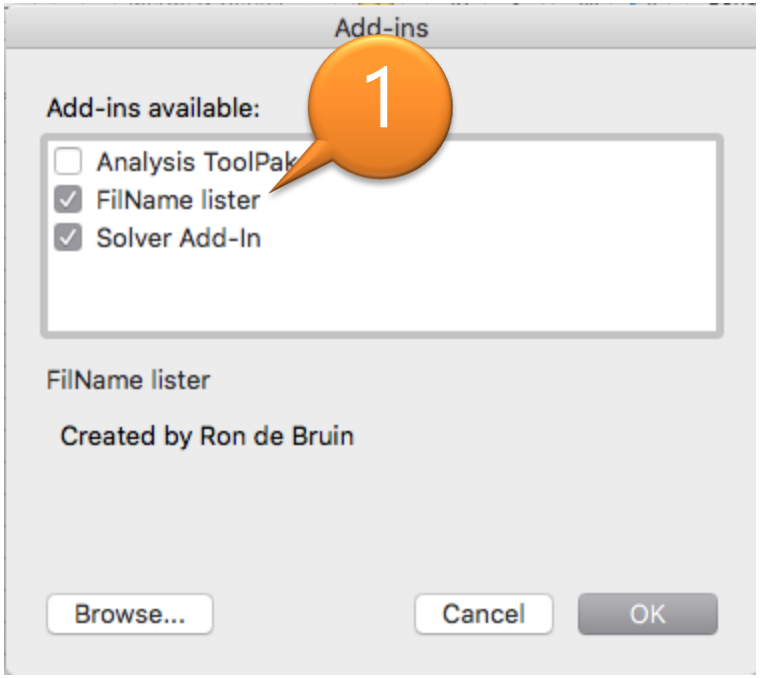
Select the worksheet “Fit_filename” and use shortcut key.



Extra add-ins required for filename list

FILE ACCESS ISSUE

If you need the database files in the different folder, follow the process here.
Download add-in: https://www.rondebruin.nl/mac/addins/filenamelister.htm



Note that Dir function does not work on mac.

FileName Lister for Mac Office 2016 (version 1.0)
This tool for Excel 2016 for the Mac creates a new workbook with a list of all filenames in the specified directory. You can select all files or a type of file and also filter on the file names.
Directory :
Browse
/Users/apple/Documents/XPS/
2
Select the type of files you want to list :
All Files
Filter Filenames :
No Filter
Include files in subdirectories (max of 10 directory levels deep)
3
Create hyperlinks
Cancel
OK
4

Save the workbook in the folder specified in “direc” as “file_list.xlsx”, and then access will be granted.
